DETAILED ACTION

Page 2

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wegner 2: (U.S. Patent No. 6,082,158). Wegner discloses an actuator comprising a rotor (30), a lever (not numbered, shown in figure 13, portion supporting 37, connected to 36 and 38 via 39) swingable between first and second positions, and an engagement mechanism comprising a protrusion (37) and a guide mechanism (32, 33, 34) that makes the lever swing between the first and second position, and allows movement of the lever without turning the rotor. Wegner further discloses the guide mechanism to include a contact portion (32) that comes in contact with the protrusion (37), a guide portion (33) that guides the protrusion to the contact portion, and an allowing portion (34) that allows, when the rotor stops rotating, movement of the protrusion without turning the rotor, wherein the rotor always stops at the allowing portion regardless of whether the lever is at the first position or the second position. Examiner notes that an invention should be distinguished from the prior art in terms of structure rather than function (see MPEP 2114). Presently, the claimed "allowing portion" is claimed in terms of its function (i.e. what it allows to occur) rather than its structure. Because Wegner discloses a feature that is structurally identical to the claimed allowing portion, it considered to be able to perform the same function.

Application/Control Number: 10/720,140 Page 3

Art Unit: 3677

4. With respect to claim 3, Wegner discloses the guide mechanism to include a first slide guide portion (non circular portion of 33) to slide the protrusion to the guide portion during rotation of the rotor in a first direction, and a second slide guide portion (circular portion of along the inner periphery of 33), that comes in contact with the protrusion to slide the protrusion to the movement support portion during rotation of the rotor in a second direction.

- 5. With respect to claims 4 and 5, Wegner discloses the contact portion (32) to have first and second contact portions (projecting portion of 32) extending in different directions. The first contact portion slides the lever to the second position during rotation of the rotor in a first direction. The second contact portion slides the lever to the first position during rotation of the rotor in the second direction.
- 6. With respect to claim 6, Wegner discloses the lever to be connected to a locking lever (36, 38) that witches between locked and unlocked positions of a door locking device.

Response to Arguments

7. Applicant's arguments filed November 28, 2005, have been fully considered but they are not persuasive. Applicant argues that Wegner does not disclose the allowing portion as claimed, or that movement of the lever without turning the rotor is accommodated. As noted in the rejection above, an invention should be distinguished from the prior art in terms of structure rather than function. The "allowing portion" is claimed as an element "that allows...". This is a functional limitation, with no claimed structure associated with it that can provide such a function. In that Wegner discloses all of the structural limitations claimed, it appears that Wegner is capable of performing the same functions.

Conclusion

Page 4

- 8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Kyle whose telephone number is 571-272-7057. The examiner can normally be reached on Monday Friday, 8:30 am 5:00 pm.
- 11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
